THE VALUE OF YOUR INTEGRATED HEALTH SCIENCES DEGREE

Students of the health sciences are encouraged to gain practical experience in the field of health. They can achieve this through cooperative learning credits, community service, campus involvement through sports and clubs, and assistantships with coaches and athletic trainers.

Graduates of MSU-Northern's Integrated Health Sciences program pursue employment as health educators, consultants, community health specialists and health coordinators. They find jobs at government agencies, non-profit organizations, hospitals, and community-based organizations. Many graduates also, apply to graduate programs throughout the country in allied health and health related programs, leading to careers, such as physical therapy, and athletic training.

15 TO FINISH

WANT TO GRADUATE ON TIME? SAVE MONEY? GET BETTER GRADES?

15

You're going to need 15. That's the number of credits you need to take each semester to graduate on time. Sure, you can take less and still receive some scholarships and funding. But unless you take 15 credits a semester (or 30 a year), you're looking at an extra year or more in order to graduate. Know the courses you need to graduate, and meet with your advisor to map out a plan to earn your degree on time.
